

# Safety

At Johnstons', safety is paramount.  
Our commitment to safety consists of:

## Active

The quality and safety of our vehicles starts with design and construction requirements specifying high safety standards. We purchase our coaches from reputable brands such as MAN, Volvo & Scania; all of which have wide angle mirrors and vehicle stability & handling to protect against accidents. They are maintained by our engineers to a rigorous schedule to ensure they are road safe at all times.

Behind the wheel of every coach is a well-trained driver. All drivers have successfully completed defensive & hazardous driver training and certification. For our South Island operations, we have specific driver accreditation for the Milford Road and for snow and ice conditions. For all drivers requiring it, they have certificates in long distance passenger driving and in case of emergency, they all have first aid training.

## Passive

All of our coaches are equipped with seatbelts to reduce passenger injury in the occurrence of an accident.

## Personal

For your personal safety there are emergency exits on every coach as well as a fire extinguisher.
